HIGH PERFORMANCE PUMPS

VARIABLE SPEED PUMPS

- ✓ Fully Variable 3 Speed Pumps
- ✓ Digital RPM Display Interface
- ✓ 1.25HP and 1.75HP Variable Speed Motors
- ✓ Ultra Quiet, Low Noise Operation
- ✓ Calibrate Speeds for Energy Efficiency

WATER & LIGHTING SOLUTIONS

www.evolutionwls.com.au

The Evoflow V3 PRO and V5 PRO variable 3 speed pumps provide complete control to the pool owner with each speed fully adjustable to suit individual pool and spas. By adjusting the pump settings for optimal flow rates, electricity and running costs can be reduced up to 70%.

The Evoflow VS Advantage

Evolution's Evoflow V3 PRO & V5 PRO pumps enable pool and spa owners to maximise their pump's efficiency, dramatically decreasing electricity costs and carbon emissions.

Unlike conventional single speed pumps that work at maximum capacity, the V3 PRO & V5 PRO utilise a permanent magnet brushless, fully variable 3 speed DC motor. This revolutionary motor allows the owner to increase and decrease each of the 3 speeds to suit their pool and spa needs. The V3 PRO / V5 PRO can be tuned to the pool and spa to save on power costs and increase filtration quality.

Whether you need to backwash, vacuum or filter your pool or spa water, the V3 PRO will save you time and money. The V5 PRO has the same energy efficiency but achieves superior performance levels as a 1.75HP motor. This model suits spa jet action and most in-floor cleaning setups.

Pool filtration takes up 99% of a pump's usage during the year, however pool filtration does not require a pump to be running at full capacity. In fact, pool filtration efficiency improves at lower flow rates. More foreign particles and waste are trapped in the filter when water flow is slowed and prolonged.

The V3 PRO / V5 PRO operate at extremely low noise levels that allow you to run the pump at night to take advantage of off-peak tariffs without disturbing neighbours.

Additionally, the V3 PRO / V5 PRO use one of the most reliable and durable pump housings and internals available. The pumps are manufactured and assembled in Australia using the highest quality parts and materials.

Warranty

- 3 year limited warranty.
- 12 months for commercial installations.
